NutriRoot ${ }^{T M}$

| Section 1. Identification |  |
| :--- | :--- |
| GHS product identifier | : NutriRoot ${ }^{\text {TM }}$ |
| Product use | : Fertilizer. |
| Supplier's details | : Arborjet <br> 99 Blueberry Hill Road <br> Woburn, MA 01801, USA <br> $1-781-935-9070$ |
| e-mail address of person <br> responsible for this SDS | : ajinformation@arborjet.com |

## Section 2. Hazards identification

## OSHA/HCS status Classification of the substance or mixture GHS label elements

Signal word : No signal word.

Hazard statements : No known significant effects or critical hazards.
Precautionary statements
General
: Read label before use.
Keep out of reach of children.
If medical advice is needed, have product container or label at hand.
Prevention : Not applicable.
Response : Not applicable.
Storage : Not applicable.
Disposal : Not applicable.
Hazards not otherwise : None known. classified
: While this material is not considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200), this SDS contains valuable information critical to the safe handling and proper use of the product. This SDS should be retained and available for employees and other users of this product.
: Not classified.

Percentage of the mixture consisting of ingredient(s) of unknown toxicity: 96.9\%

## Section 3. Composition/information on ingredients

| Substance/mixture | $:$ Mixture |
| :--- | :--- |
| Other means of <br> identification | $:$ Not available. |

CAS number/other identifiers

| CAS number | $:$ Not applicable. |
| :--- | :--- |
| Product code | $:$ 030-4103 (1 Gallon) |

| Ingredient name | $\%$ | CAS number |
| :--- | :--- | :--- |
| zinc sulphate (anhydrous) | $\geq 1-<3$ | $7733-02-0$ |

Any concentration shown as a range is to protect confidentiality or is due to batch variation.

| Date of issue/Date of revision | $: 02 / 20 / 2015$. Date of previous issue | $:$ February 2014. | Version : 2 | $1 / 11$ |
| :--- | :--- | :--- | :--- | :--- |

## Section 3. Composition/information on ingredients

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.
Occupational exposure limits, if available, are listed in Section 8.

## Section 4. First aid measures

## Description of necessary first aid measures

| Eye contact | : Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Get medical attention if irritation occurs. |
| :---: | :---: |
| Inhalation | : Remove victim to fresh air and keep at rest in a position comfortable for breathing. Get medical attention if symptoms occur. In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours. |
| Skin contact | : Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Get medical attention if symptoms occur. |
| Ingestion | : Wash out mouth with water. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if symptoms occur. |

## Most important symptoms/effects, acute and delayed

## Potential acute health effects

| Eye contact | $:$ No known significant effects or critical hazards. |
| :--- | :--- |
| Inhalation | : No known significant effects or critical hazards. |
| Skin contact | : No known significant effects or critical hazards. |
| Ingestion | : No known significant effects or critical hazards. |

## Over-exposure signs/symptoms

| Eye contact | $:$ No specific data. |
| :--- | :--- |
| Inhalation | $:$ No specific data. |
| Skin contact | $:$ No specific data. |
| Ingestion | $:$ No specific data. |

## Indication of immediate medical attention and special treatment needed, if necessary

| Notes to physician | $:$In case of inhalation of decomposition products in a fire, symptoms may be delayed. <br> The exposed person may need to be kept under medical surveillance for 48 hours. |
| :--- | :--- |
| Specific treatments | $:$ No specific treatment. |
| Protection of first-aiders | $:$ No action shall be taken involving any personal risk or without suitable training. |

## See toxicological information (Section 11)

## Section 5. Fire-fighting measures

Extinguishing media

Suitable extinguishing media
Unsuitable extinguishing media
: CO2, dry chemical, and water fog. Use media that is appropriate for surrounding materials.
: None known.

Specific hazards arising : In a fire or if heated, a pressure increase will occur and the container may burst.

## Section 5. Fire-fighting measures

Hazardous thermal decomposition products
: Decomposition products may include the following materials: nitrogen oxides sulfur oxides phosphorus oxides metal oxide/oxides carbon monoxide carbon dioxide

Special protective actions for fire-fighters

Special protective equipment for fire-fighters
: Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.
: Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

## Section 6. Accidental release measures

## Personal precautions, protective equipment and emergency procedures

For non-emergency personnel
: No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Put on appropriate personal protective equipment.
For emergency responders : If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For nonemergency personnel".

Environmental precautions : Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

## Methods and materials for containment and cleaning up

## Small spill

Large spill
: Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.
: Stop leak if without risk. Move containers from spill area. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

## Section 7. Handling and storage

## Precautions for safe handling

Protective measures
Advice on general
occupational hygiene
: Put on appropriate personal protective equipment (see Section 8).
: Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

Conditions for safe storage, : Store in accordance with local regulations. Store in original container protected from including any
incompatibilities
direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.

## Section 8. Exposure controls/personal protection

## Control parameters <br> Occupational exposure limits <br> None.

## Appropriate engineering controls <br> Environmental exposure controls

## Individual protection measures

Hygiene measures
: Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

Eye/face protection

## Skin protection <br> Hand protection

Body protection

Other skin protection

Respiratory protection

Personal protective equipment (Pictograms)
: Good general ventilation should be sufficient to control worker exposure to airborne contaminants.
: Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.
: Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with sideshields.

Recommended: splash goggles
: Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary.
Recommended: rubber gloves
: Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
: Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
: Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.
:

## Section 9. Physical and chemical properties

## Appearance

| Physical state | $:$ Liquid. |
| :--- | :--- |
| Color | $:$ Brown. |
| Odor | $:$ Slightly aromatic, earthy [Slight] |
| Odor threshold | $:$ Not available. |
| pH | $: 3.9$ |
| Melting point | $:$ Not available. |
| Boiling point | $: 100^{\circ} \mathrm{C}\left(212^{\circ} \mathrm{F}\right)$ |
| Flash point | $:$ Not available. |

## Section 9. Physical and chemical properties

| Evaporation rate | Not available. |
| :---: | :---: |
| Flammability (solid, gas) | Not available. |
| Lower and upper explosive (flammable) limits | Not available. |
| Vapor pressure | : Not available. |
| Vapor density | : Not available. |
| Relative density | : Not available. |
| Solubility | Easily soluble in the following materials: cold water. |
| Partition coefficient: noctanol/water | : Not available. |
| Auto-ignition temperature | : Not available. |
| Decomposition temperature | : Not available. |
| Viscosity | : Not available. |

## Section 10. Stability and reactivity

Reactivity

Chemical stability : The product is stable.

Possibility of hazardous reactions

Conditions to avoid : No specific data.

Incompatible materials : Strong acids or alkali materials and strong oxidizers. products

Hazardous decomposition : Under normal conditions of storage and use, hazardous decomposition products should
: No specific test data related to reactivity available for this product or its ingredients.
: Under normal conditions of storage and use, hazardous reactions will not occur. not be produced.

## Section 11. Toxicological information

Information on toxicological effects
Acute toxicity
Not available.
Irritation/Corrosion

| Product/ingredient name | Result | Species | Score | Exposure | Observation |
| :--- | :--- | :--- | :--- | :--- | :--- |
| zinc sulphate (anhydrous) | Eyes - Moderate irritant | Rabbit | - | 420 <br> Micrograms | - |

## Sensitization

Not available.
Mutagenicity
Not available.

## Carcinogenicity

Not available.
Reproductive toxicity
Not available.
Teratogenicity
Not available.
Specific target organ toxicity (single exposure)

## Section 11. Toxicological information

Not available.

## Specific target organ toxicity (repeated exposure)

Not available.

## Aspiration hazard

Not available.

| Information on the likely <br> routes of exposure | : Not available. |
| :--- | :--- | :--- |
| Potential acute health effects |  |
| Eye contact Inhalation | No known significant effects or critical hazards. |
| Skin contact | No known significant effects or critical hazards. |
| Ingestion | : No known significant effects or critical hazards. |

Symptoms related to the physical, chemical and toxicological characteristics

| Eye contact | $:$ No specific data. |
| :--- | :--- |
| Inhalation | : No specific data. |
| Skin contact | : No specific data. |
| Ingestion | : No specific data. |

Delayed and immediate effects and also chronic effects from short and long term exposure

## Short term exposure

Potential immediate : Not available.
effects
Potential delayed effects : Not available.
Long term exposure
Potential immediate : Not available.
effects
Potential delayed effects : Not available.
Potential chronic health effects
Not available.

| General | : No known significant effects or critical hazards. |
| :--- | :--- |
| Carcinogenicity | : No known significant effects or critical hazards. |
| Mutagenicity | : No known significant effects or critical hazards. |
| Teratogenicity | : No known significant effects or critical hazards. |
| Developmental effects | : No known significant effects or critical hazards. |
| Fertility effects | : No known significant effects or critical hazards. |

## Numerical measures of toxicity

Acute toxicity estimates

| Route | ATE value |
| :--- | :--- |
| Oral | $2563.5 \mathrm{mg} / \mathrm{kg}$ |

## Section 12. Ecological information

## Toxicity

| Product/ingredient name | Result | Species | Exposure |
| :---: | :---: | :---: | :---: |
| zinc sulphate (anhydrous) | Acute IC50 $44.8 \mu \mathrm{~g} / \mathrm{I}$ Fresh water <br> Acute LC50 $4 \mu \mathrm{~g} / \mathrm{l}$ Marine water <br> Acute LC50 $21.8 \mu \mathrm{~g} / \mathrm{I}$ Fresh water <br> Acute LC50 $2.36 \mu \mathrm{~g} / \mathrm{I}$ Fresh water Chronic NOEC $142.5 \mu \mathrm{~g} / \mathrm{l}$ Marine water Chronic NOEC $45 \mu \mathrm{~g} / \mathrm{I}$ Marine water <br> Chronic NOEC 1.7 mg/l Fresh water <br> Chronic NOEC $26 \mu \mathrm{~g} / \mathrm{I}$ Fresh water | Algae - Pseudokirchneriella subcapitata - Exponential growth phase <br> Crustaceans - Temora stylifera Adult <br> Daphnia - Daphnia magna Neonate <br> Fish - Cirrhinus mrigala <br> Algae - Ulva fasciata - Zoea <br> Crustaceans - Acanthomysis costata - Juvenile (Fledgling, <br> Hatchling, Weanling) <br> Daphnia - Daphnia magna - <br> Neonate <br> Fish - Jordanella floridae | 72 hours <br> 48 hours <br> 48 hours <br> 96 hours <br> 96 hours <br> 21 days <br> 21 days <br> 100 days |

## Persistence and degradability <br> Not available.

## Bioaccumulative potential

| Product/ingredient name | LogPow | BCF | Potential |
| :--- | :--- | :--- | :--- |
| zinc sulphate (anhydrous) | -0.07 | 60960 | high |

## Mobility in soil

Soil/water partition
Not available

Other adverse effects
: No known significant effects or critical hazards.

## Section 13. Disposal considerations

: The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.
