1. Break pre-filled baits apart from the plastic frame.
2. Hold bait upright. Hold firmly with one hand while breaking off the bait pack tab.
3. Place baits, label side up, near ant trails or close to where ants are numerous. Place additional baits anywhere ants may enter your home. For best results, use seven baits to ensure sufficient supply for the ants.
4. Monitor regularly for activity but do not interfere with the ants or baits. Replace with additional baits when first set is depleted.
5. Once ants are controlled, replace baits every three months to keep ants from returning.
