

# D•TOX Flowable Charcoal

## PLANT PROTECTANT AND LIQUID SAFING AGENT

For decontamination of pesticide spills and oil spills.

### ACTIVE INGREDIENT:

Activated Carbon ..... 20%

## Keep Out Of Reach Of Children

### CAUTION

#### FIRST AID

- IF ON SKIN: Wash contacted area with soap and water.
- IF IN EYES: Flush eyes with water for at least 15 minutes. If irritation persists seek medical attention.
- IF INGESTED: Do not induce vomiting, seek medical attention.

#### PRECAUTIONARY STATEMENTS

##### • HAZARDS TO HUMAN AND DOMESTIC ANIMALS

CAUTION—Avoid prolonged contact with skin. Wash hands thoroughly after using. Avoid contact with eyes. In case of contact with eyes, flush eyes for 15 minutes with water and seek medical attention if irritation persists. If taken internally, seek medical attention. Avoid breathing spray mists.

##### • PERSONAL PROTECTIVE EQUIPMENT (PPE)

Wear protective clothing including plastic or rubber gloves and chemical goggles or safety glasses with side shields when handling or applying this product.

**USER SAFETY RECOMMENDATIONS:** User should wash hands before eating, chewing gum, using tobacco, or using the toilet. Wash outside of gloves before removing.

##### • ENVIRONMENTAL HAZARDS

Do not apply directly to water or contaminate water by cleaning of equipment or disposal of waste. Do not contaminate irrigation ditches or water used for domestic purposes. Flush spray tank and lines in a suitable area after use.

##### • STORAGE AND DISPOSAL

**Storage:** DO NOT contaminate water, food, or feed by storage or disposal. Store in original containers only in a secure area inaccessible to children and unauthorized persons.

**Chemical Disposal:** Spray solution, tank rinsate, or product that cannot be used according to label instructions must be disposed of in accordance with all applicable federal, state and local laws.

**Container Disposal:** Do not reuse empty container. Triple rinse (or equivalent) and offer for recycling or reconditioning or dispose in a sanitary landfill or by other methods approved by federal, state, or local laws.

Keep From Freezing.  
Shake Well Before Using!

## GENERAL INFORMATION

D•TOX Flowable Charcoal is a flowable product containing activated carbon to be used for spill decontamination, soil decontamination, plant protection, seed protection, and spray equipment cleaning. D•TOX Flowable Charcoal is not phytotoxic to fine turf or ornamentals, including nursery stock, bedding plants, sod, and seed.

## DIRECTIONS FOR USE

### Spill Decontamination

D•TOX Flowable Charcoal may be used to decontaminate soils which have been contaminated by spills of organic herbicides, fungicides, insecticides, gasoline, motor oil, or hydraulic fluid. As quickly as possible after the spill, apply D•TOX Flowable Charcoal at a rate of 1-2 gal/150 sq ft. Use the higher rate for more concentrated spills. Apply the product undiluted or diluted up to 1 gallon in 3 gallons water, or as required for proper spraying. Any type of spray equipment may be used. For spot treatment of small spills, apply undiluted product directly from the container or from a common sprinkler can.

### Turf Reseeding

D•TOX Flowable Charcoal can be used to reseed turfgrass earlier than normal on soils which have been treated with pre-emergence crabgrass herbicides or other organic herbicides. Treat the soil with 1 gallon

product in 3-5 gallons of water per 300 sq ft. Water into the soil. The treated area can be reseeded after 24 hours.

### Spray Equipment

After cleaning the spray tank and hoses with Cleary's TANK CLEANER or other suitable cleaner, fill the tank half-full with clean water. Add one gallon D•TOX Flowable Charcoal per 100 gallons of water in the tank. Fill the tank completely and agitate/recirculate for 10-15 minutes. Drain the rinsate into a non-crop area.

### Bare Root Transplanting

D•TOX Flowable Charcoal may be used to protect the root system of transplants against injury due to trace contamination. Bare root transplants are very susceptible to damage at that time. Prepare a slurry of 1 part product and 1 part water. Dip roots thoroughly into the slurry and plant while wet.

### Protective Barrier

To protect established trees and shrubs from damage due to leaching of persistent herbicides, incorporate a 50% solution of D•TOX Flowable Charcoal in water into a barrier trench 4-8 inches deep or as required. One gallon of product will protect approximately 15-20 linear feet.

### Seed Protection

D•TOX Flowable Charcoal will protect seed rows from herbicide treatment when applied as a layer over seed rows. Apply a slurry mix of 3 gallons product in 3 gallons water per 1,000 sq ft banded directly over the seedbed.

### LIMITED WARRANTY AND DISCLAIMER

CLEARY CHEMICAL CORPORATION warrants that this material conforms to the chemical description on the label and is reasonably fit for the purposes referred to in the Directions for Use, subject to the risks referred to therein. CLEARY CHEMICAL CORPORATION makes no other expressed or implied warranty of fitness or merchantability or any other expressed or implied warranty. In no case shall CLEARY or seller be liable for consequential, special or indirect damages resulting from the use or handling of this product including, but not limited to, loss of profits, business reputation, or customers, labor costs, or other expenses incurred in planting or harvesting. CLEARY and seller offer this product and the buyer and user accept it subject to the foregoing conditions of sale and warranty which may be varied only by agreement in writing signed by a duly authorized representative of CLEARY CHEMICAL CORPORATION.
