KEEP OUT OF REACH OF CHILDREN

CAUTION

SHAKE BEFORE USING

Manufactured For
MILLER CHEMICAL & FERTILIZER CORPORATION
P.O. Box 333
Hanover, Pennsylvania 17331

Net Contents: 1 Quart Liquid

DIRECTIONS FOR USE

FOAM FIGHTER is designed to reduce foam in agricultural chemical sprayers and also in dip tanks, such as those used in the grading of Peaches and Apples.

RATE OF APPLICATION: Use 1 to 3 squirts whenever it is necessary to reduce foam in the tank. Foam develops in spray tanks when highly emulsified agricultural chemicals and surfactants are placed in the spray tank during the filling and agitating operation. When the spray tank is more than half full, many times a large amount of foam will almost fill the balance of the tank. In order to complete the filling operation of the tank, the foam must be removed. This is the time to use **FOAM FIGHTER**.

Use this product in accordance with good agronomic practices, which include utilizing proven spray equipment set for proper coverage. Do not make applications when temperatures are too hot. Applications should be made at temperature levels and when other environmental conditions in your area are such that your experience indicates the application will be compatible and will accomplish the desired result.

The use of this material being beyond our control and involving elements of risk to human beings, animals and vegetation, we do not make any warranty, express or implied, as the effect of such use, when this product is not used in accordance with the directions as stated on this label.
