

Clark is the S.M.A.R.T.(er) Choice

Our efforts to bridge conventional pest control methods with environmentally-conscious alternatives have been recognized by the California Department of Pesticide Regulations!

CLARK PEST CONTROL RECEIVES 2009 IPM INNOVATOR AWARD FOR EFFORTS TO REVOLUTIONIZE THE PEST MANAGEMENT INDUSTRY

"IPM Innovators are role models for change from traditional pest control to strategies that reduce or eliminate toxic pesticides," said DPR Director Mary-Ann Warmerdam. "One of our missions is to encourage through recognition the use of pest control methods that are more protective of public health and the environment. We especially applaud Clark Pest Control for its efforts to find a replacement for pyrethroid pesticides for residential pest control."

Our S.M.A.R.T.® service and business philosophy is based on IPM (Integrated Pest Management) which refers to an environmentally sensitive approach to pest management with the least possible hazard to people, property, and the environment.

In addition, Clark helped to develop GreenPro, a national IPM certification program for the pest management industry, and was one of the first companies in California and nationwide to become certified. In fact, Clark Pest Control has more GreenPro certified technicians than any other pest management company in the country.

Trusted Service. Proven Results. Environmental Consciousness. Since 1950
